Projects:

1. Selise Cam:

The digital video from the network cameras at multiple locations, can easily be transferred over the existing IP network. Using the diagram below, let us say you have offices located in Dhaka, Switzerland, Dubai etc. By installing IP cameras at these locations the video can then be transported over the Internet to a central location, like Bangladesh Office, and then stored on a central storage server. All this can be live streaming & management stored video at one location using a web portal. Also I have done lots of projects about bandwidth shaping & management.
